KnK Mudslinger SR-III

The third generation of the popular KnK Mudslinger, the SR-III is a new offering from KnK for the off-road buff.

Seen to be an ideal "runabout" for visiting hard-to-reach locations on locations. The compact dimensions and excellent ground clearance means that it can access narrow paths and trails, normally the domain of two wheelers, in a safe and fun way.

The convenience of an electric start reliable Honda engine and CVT (Constantly Varying Automatic Transmission) drive alongside a reverse gear and hand brake permit the KnK Mudslinger to traverse to remote areas overcoming steep inclines and undulating terrain in safety and comfort, thanks to the long travel suspension system. Powerful LED lights including a reverse light and tail lamp permit the KnK Mudslinger to be used round the clock!
